## Example Codes Used By Surgeons

.....

### Procedure

- CPT 28585: Open Treatment of Talotarsal Joint Dislocation, Includes Internal Fixation, When Performed
- CPT 28555: Open Treatment of Tarsal Bone Dislocation, Includes Internal Fixation, When Performed

### Possible Additional Procedures

- CPT 27687: Gastrocnemius Recession (eg. Strayer Procedure)

### Possible ICD-10-CM Diagnostic Codes | \*Other's May Apply

- S93.314A - Dislocation of tarsal joint of right foot, initial encounter
- S93.315A - Dislocation of tarsal joint of left foot, initial encounter
- 719.7 - Painful ambulation
- 718.37 - Recurrent Dislocation/Displacement - ankle and foot

### Possible HCPCS II Code:

- C1762: Connective Tissue, Human (Includes Fascia Lata)

### Reimbursement

- Primary procedure reimbursement at 100%
- Secondary, tertiary etc. procedures reimbursement at 50%
- Not all additional procedures may be applicable or reimbursed

### Surgical Notes Per Physician Recommendation

- The patient has failed standard of care conservative therapies i.e. shoe modification, foot orthotics, injections, AFO bracing and physical therapy.
- The safest and most efficacious method of repair of the ligamentous structures is with a soft tissue allograft. Alternative surgical procedures such as calcaneal osteotomy, tendon transfer and joint arthrodesis do not address the ligament instability.
- Talocalcaneal ligament laxity - instability due to repetitive trauma and/or traumatic talotarsal dislocation - requiring surgical intervention with repair and stabilization of the talocalcaneal joint via ligament repair.
- Supplementing or augmenting the talocalcaneal ligament providing structural support and reinforcement.
